TYPLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules
TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules
FILE REFERENCE: 18617.0052
CURRENT APPLICATION NUMBER: US/09/193,562D
CURRENT FILING DATE: 1999-11-17
PRIOR FILING DATE: 1999-11-17
PRIOR FILING DATE: 1997-11-17
SEQ ID NO 28
LENGTH: 914
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         CAAAGAATTGTGTGTTTAGTCCTTGACAAATCTGGAAGCATGGCGACTGGTAACCGCCTC

| Sequence 46, Application US/09193562D |
| Patent No. 6309B15 |
| GENERAL INFORMATION: |
| GENERAL INFORMATION: |
| APPLICANT: Pauli, Benedicht U. |
| TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium |
| TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules |
| FILE REFERENCE: 18617.0052 |
| CURRENT APPLICATION NUMBER: US/09/193, 562D |
| CURRENT FILING DATE: 1998-11-17 |
| PRIOR FILING DATE: 1997-11-17 |
| NUMBER OF SEQ ID NOS: 47 |
| LENGTH: 903

Sequence 31, Application US/09193562D

Taring OF INVENTION: Auclivated Chloride Channel-Adhesion Molecules

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

FILE REFERENCE: 18617.0052

CURRENT FILING DATE: 1998-11-17

PRIOR FILING DATE: 1998-11-17

PRIOR FILING DATE: 1997-11-17

NUMBER OF SEQ ID NOS: 47

LENGTH: 2970
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       1 CTATAGTTGAATTCTGTACAGAACAAAACCACAACAAAGAAGCTCCAAACAAGCAAAATC
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Gaps
Patent No. 6309857
GENERAL INFORMATION:
APPLICANT: Pauli, Benedicht U.
TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium
TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules
FILE REFERENCE: 18617.0052
CURRENT APPLICATION NUMBER: US/09/193,562D
CURRENT PILING DATE: 1999-11-17
PRIOR APPLICATION NUMBER: US/60/065,922
PRIOR FILING DATE: 1997-11-17
NUMBER OF SEQ ID NOS: 47
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               ;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            9

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 28, Application US/09193562D

Sequence 28, Application US/09193562D

Patent No. 6309857

GENERAL INFORMATION:

APPLICANT: Pauli,

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

FILE REFERENCE: 18617.005

CURRENT APPLICATION NUMBER: US/09/193,562D

CURRENT FILING DATE: 1998-11-17

PRIOR APPLICATION NUMBER: US/60/065,922

PRIOR APPLICATION NUMBER: US/60/065,922

PRIOR APPLICATION NUMBER: US/60/065,922

NUMBER OF SEQ ID NOS: 47

LENGTH: 914
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     3 ATAGITGAATICTGTACAGAACAAAACCACAAAGAAGAAGCTCCAAACAAGCAAAATCAA

US-U9-23-624.

Sequence 6, Application US/09623624

Patent No. 6576434

GENERAL INFORMATION:

APPLICANT: Magainin Pharmaceuticals, Inc.

APPLICANT: Magainin Pharmaceuticals, Inc.

TITLE OF INVENTION: Atchina-Associated Factors as Targets for Treating TITLE OF INVENTION: Atchina-Associated Factors as Targets for Treating TITLE OF INVENTION: Discrete Including Asthma and Related FILE REFERENCE: 36870-5073-40

CURRENT APPLICATION NUMBER: US/09/623,624

CURRENT FILING DATE: 1990-00-05

PRIOR FILING DATE: 1996-08-23

PRIOR PILING DATE: 1996-08-23

Sequence 12, Application US/09193562D

Patent No. 6309857

GENERAL INFORMATION:

APPLICANT: Pauli, Benedicht U.

TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules

CURRENT PELING DATE: 1991-11-17

PRIOR PILING DATE: 1997-11-17

NUMBER OF SEQ ID NOS: 47

SEQ ID NO 12

LENGTH: 821

TYPE: RT

ORGANISM: Unknown

FEATURE:

CORGANISM: Unknown

CORGANISM: ORCHOWING CHANNER:

COTHER INFORMATION: Variant of Lu-ECAM-1 from bovine endothelial cells
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      3 ATAGTIGAATICTGIACAGAACAAAACCACAACAAAGAAGCICCAAACAAGCAAATCAA 62
